SUMMARY

Motivated and enthusiastic second-year student at AAST College of Computing and Information Technology, pursuing a major in Software Engineering. Eager to apply my knowledge and skills in real-world settings and continuously learn and hone new lessons. Accomplished Product Management IT Intern in Arma Co and Sawali Co, preparing me with hands-on experience. Detail-oriented with success supporting fast-paced teams with management and inventory management, strong organizational and time management skills. Implements strategic and tactical marketing campaigns to drive engagement and sales, bringing a solid track record of contributing to program operations efficiency, conversion rates, and customer success. Well-versed in both online and traditional marketing approaches.

EXPERIENCE

Product Manager Intern

Arma Co

July 2024 - September 2024, Cairo, Egypt

- Managed project timelines, resources, and budgets to ensure on-time delivery of high-quality products.
- Delivered impactful presentations at industry conferences, promoting brand awareness and driving interest in company products.
- Implemented Agile methodologies to streamline processes and improve overall team efficiency in product development cycles.
- Negotiated contracts with vendors, securing favorable terms for partnerships essential to the success of various projects.
- Collaborated with a Senior Cos on a ML Model for the company..

IT Intern

IT Intern Sawali Co

August 2023 - October 2023, Cairo, Egypt

- Gained comprehensive knowledge in managing Service Desk operations, Networking, and IT Technical Support.
- Worked closely with IT professionals to enhance practical skills and understanding of IT infrastructure..

PROJECT

RAY SCAN Mobile Application

AAST • github.com/Ezzaldeen-Saeed/RayScan

• October 2024 - January 2025

- For our Software Requirements and Specifications project, my team and I developed a Flutter mobile application. The project encompassed requirements gathering and problem definition, including motivation, objectives, functional and non-functional requirements, constraints, and a literature review. We also performed dataset preprocessing and database analysis, followed by design activities: ERD, Schema, DFD, Sequence Diagram, Use Case Diagram, Storyboard, UI/UX, Class Diagram, and CRUD Matrix creation. We built and trained two computer vision models for bone fracture and chest disease detection, respectively. Software testing included unit, system, integration, acceptance, security, and automated testing. Finally, we developed a dashboard to display application statistics.

Pharmacy Management System

AAST • github.com/FAHDZERO/Pharmacy-Management-System

- February 2023 - June 2023
- Developed a fully functional multi-user system to manage pharmacy inventory, store authorities, and customizable interface supporting both Arabic and English.
- Utilized JavaFX, socket programming, and other technologies to enhance functionality and performance.
- Web Development: Created multiple websites with varying complexities, catering to client requirements and adhering to modern web development standards..

EDUCATION

Software Engineering

Arab Academy For Science, Technology & Maritime Transport (AAST) • Aswan • 2026

Member of GDSC Robotics Core member

Minor in Robotics • Arab Academy For Science, Technology & Maritime Transport (AAST) • Aswan • 2023

SKILLS

Languages

Arabic: First Language

English: C2

French: B1

Programming Languages

C, C++, Python, Python Flask, Java, JavaFX, Java Swing, Flutter, HTML, JS, CSS, PHP, Typescript, SQL, Microsoft Office

Teamwork: Proficient in collaborating within team settings, Methodologies: Experienced with Agile and Scrum principles

Project Work: Hands-on experience with real-life projects for clients, Technical problem solving

Critical Thinking: Strong problem-solving skills and decision-making abilities, Communication: Excellent presentation and communication skills
